DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I claim(s) 1-4, 10-17, 23-26, 28-30, 36-37, 46 drawn to as method of transmission of application data providing a plurality of application data tables containing information about applications contained within a bouquet of services, with a specific TID extension value assigned to each application data table associated with a bouquet of services.

Group II, claim(s) 5, 8, 18, 21, 31, 34, 43, 46, drawn to a method of transmission of application data providing an application data table which includes information regarding which applications maybe accessed via each service.

Group III, claim(s) 6, 19, 32, 44, drawn to a method of transmission of application data providing an application data table which includes a memory relating to the size of the memory required to execute an application.

Group IV, claim(s) 7, 20, 33, 45, drawn to a method of transmission of application data providing an application data table which includes a flag value concerning the action to be taken with an application upon a change of service.

Group V, claim(s) 9, 22, 35, 47, drawn to a method of transmission of application data providing an application data table, which includes a priority value indicating the relative priority of an application.

The inventions listed as Groups I-V do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Group I relates to transmission of application data table for applications within a bouquet of services for informing the viewer of available services before the extraction of PMT, groups II and V relates to transmission of application data table over multiple bouquet of services and access privileges of the applications exclusive to a particular service, group III and IV relate to the extraction of the service from the PMT for execution at the receiver.

2. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply

does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Usha Raman whose telephone number is (571) 272-7380. The examiner can normally be reached on Mon-Fri: 9am-6pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Christopher Kelley can be reached on (571) 272-7331. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
